

Meet ELO: one platform for engaging education

Coming up with and preparing engaging lessons often takes (too) much time. The new ELO platform offers flexible teaching materials that can be used at any desired moment, enabling teachers to teach more efficiently and save time.

A single tool that supports all functions required for an easy to use and innovative learning platform:

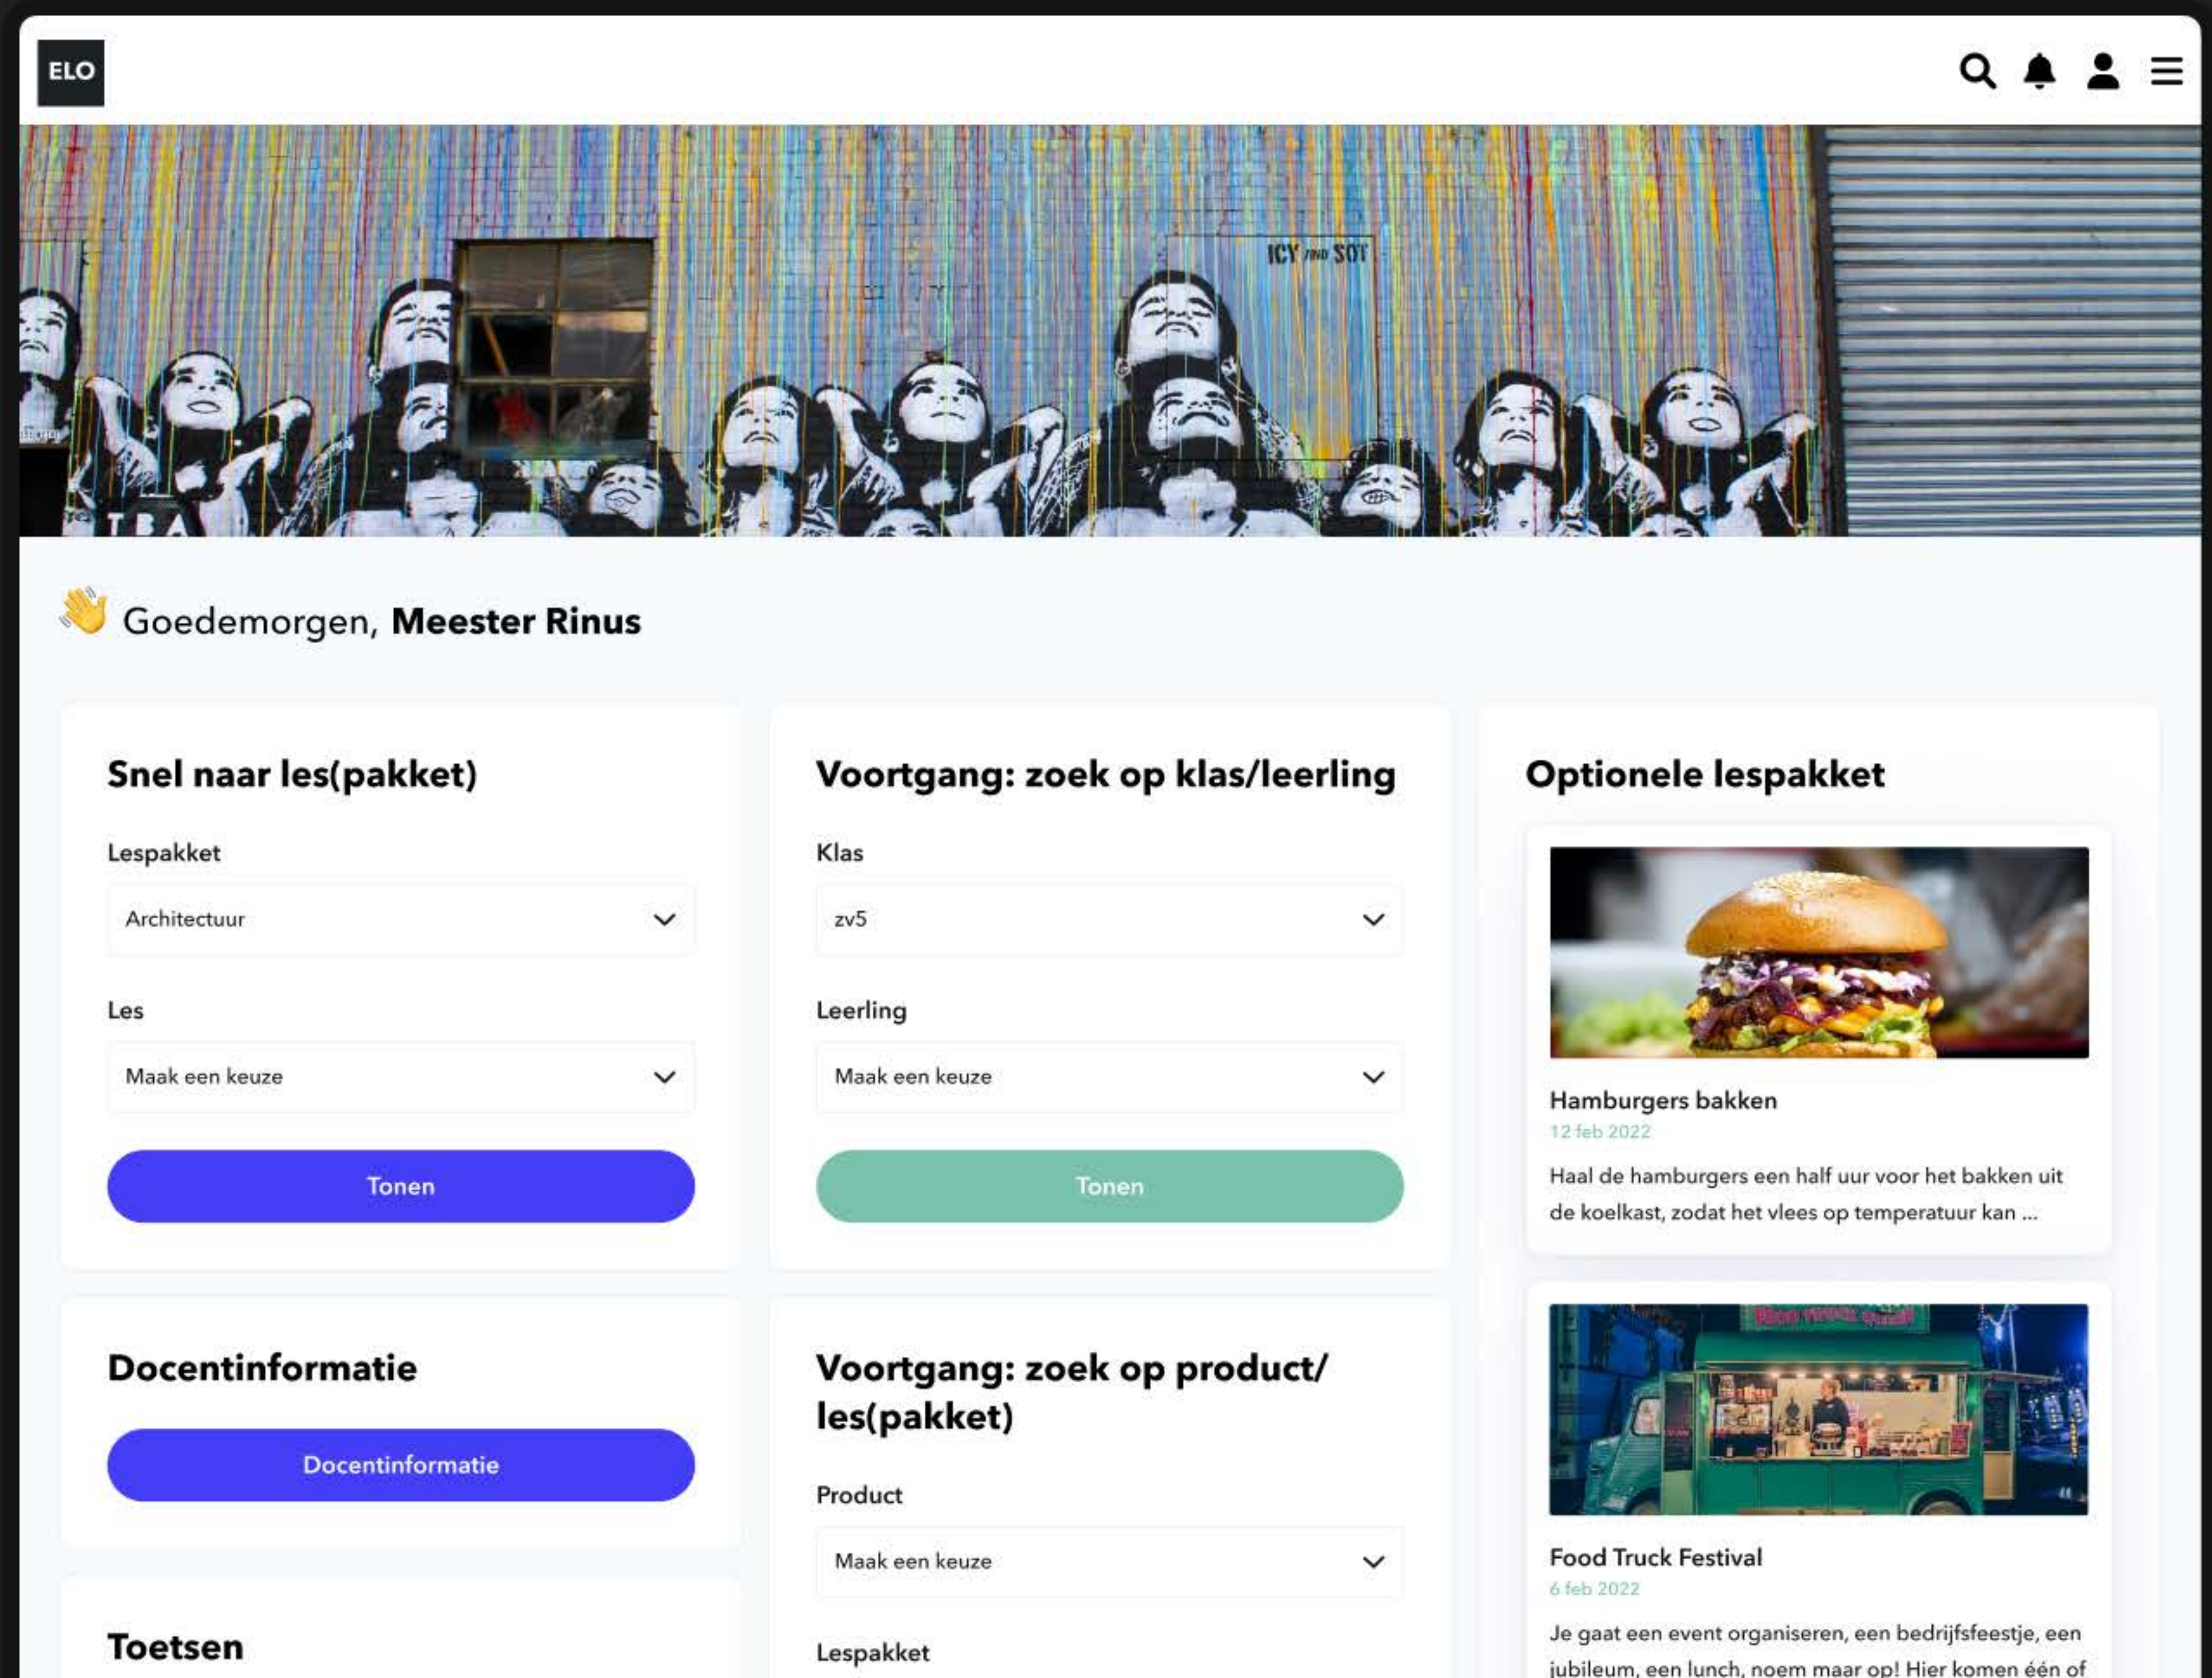

- Comprehensive support for practical education, clear progress tracking, and management functions for teachers.
- School class lessons and quizzes.
- Efficient grading and classroom evaluation with personal student feedback.
- Portfolio creation and presentation.
- Custom lesson and quiz creation.

Review. Process. Assess.

The dashboard serves as the central homepage of the learning portal, providing users with quick and easy access to various functions:

1. View student work progress by class/ student.
2. Check progress by lesson (package).
3. Access teaching materials.
4. Assign optional subjects to students.
5. Review student portfolios.

The screenshot shows the ELO Platform dashboard. At the top, there's a header with the ELO logo and navigation icons (search, notifications, user profile, and a menu). Below the header is a large banner image featuring a group of people looking up, with the text 'ICY AND SOY' visible. The main content area is divided into several sections:
