

FINALIST PRESENTS

Powering progress in Noord-Holland

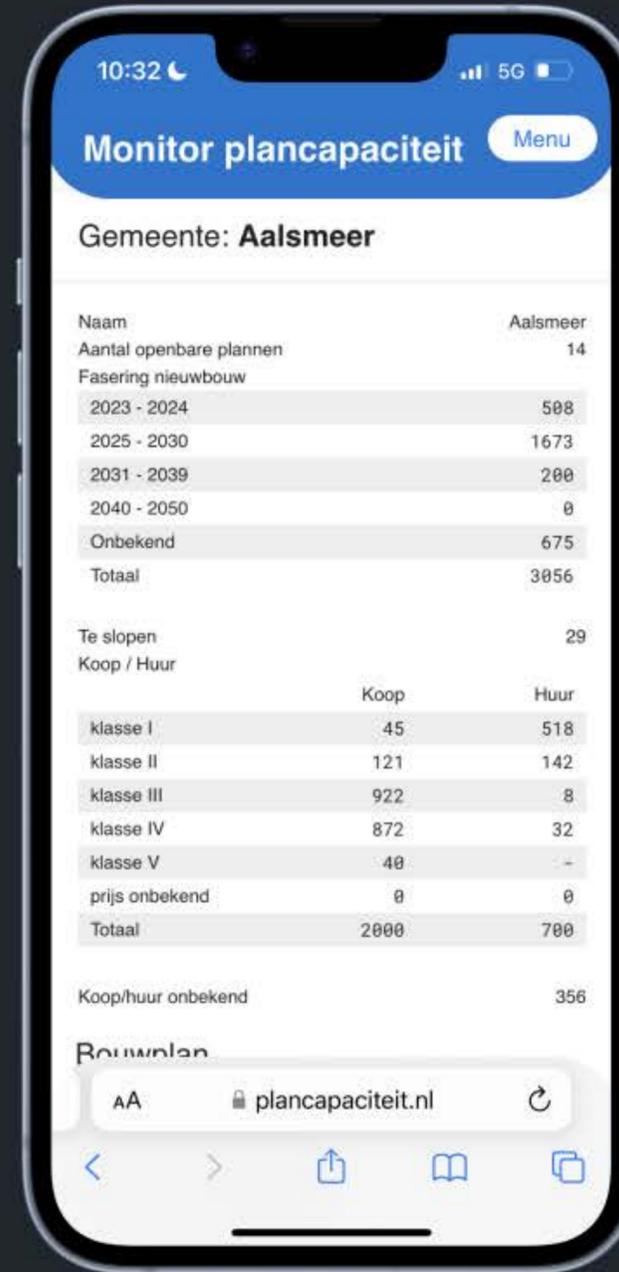

The primary purpose of the Monitor Plancapaciteit (Plan Capacity Monitor) is to provide up-to-date and reliable insight into housing construction plans in the Noord-Holland region.

This information is crucial for effective spatial planning and is used by various stakeholders, including government bodies, construction companies, housing associations, and energy suppliers.

USER-FRIENDLY DESIGN

Design thinking methodology is utilized as a key approach to ensuring user-friendliness in the platform's design.

“Minister De Jonge states that he considers the Plan Capacity Monitor of the province of North Holland "a good example" of how plan capacity can be visualized and how it can be used to accelerate housing construction”

Hugo De Jonge

Minister of Housing and
Spatial Planning

PLAN CAPACITY MONITOR

Government and Social Impact

The Plan Capacity Monitor has a significant impact on government planning and managing housing plans.

It addresses current issues such as sustainability, housing shortages, and the nitrogen debate in the Netherlands.

The project's success is recognized by government officials and serves as a model for planning capacity visualization.
